

RELEASE 5.04
Summary of Fixes - April 2011

Fix Ref:	Applications > Supporting Documents
469	<i>Remove site plan link from Supporting Docs section</i> This fix has removed the Site Plan link which appeared in the Supporting Docs section which did not require to be there.
	Registration
4582	<i>Amended Country field on Registration page</i> This fix ensures the 'Country' field on the Registration page defaults correctly to the UK.
4546	<i>Fix to ensure Continue button on the 'Change User Type' confirmation screen works in Firefox</i> Until this fix was put in place, only the space surrounding the text on the continue button on the change user type confirmation screen in Firefox worked and when clicking on the letters within the button nothing happened. This is now fixed and the Continue button can be used correctly.
	Site Content
480	<i>Fix to downloaded Files</i> Previous issues with downloading files with spaces contained in the filename have now been resolved.
489	<i>Fix to correct accessible language version</i> Users can now access the appropriate language version of the Portal directly by using the relevant link.
495	<i>Fix to amend Accessible Version link text to High Contrast</i> The title of the link to the 'High Contrast Version' is displayed incorrectly as 'Accessible Version' when users are using the Accessible version of the site. This fix now ensures the correct title is shown in the correct page when opened.
	Agent Administration
4578	<i>Fix to correct Account Disabled message</i> Until the fix was put in place, when the agent user selected "Planning – Make an application" and "Planning – View your application", the Account Disabled message displayed an "Error 404" error message. This is now corrected and an error message is no longer displayed. The Account Disabled message is also now displayed in the middle of the page, not at the top.
	Homepage Portlets
4224	<i>Text on Homepage portlets</i> This fix enables the minimise/maximise text which didn't previously appear when hovering over the icon on the homepage portlets to show correctly.
491	<i>Fix to update street information on LPA portlets</i> On the 'Find your LPA' portlet, the relevant contact portal address for the searched LPA now shows in full. Previously the field 'Street' displayed the partial address.
	For Welsh Users only:
	Permission
4606	<i>Fix to resolve display issues on Welsh language 'Do you need permission' page</i> This fix has removed duplicate content that was displayed on the welsh language 'Do you need permission page'. The fix has also ensured that the page is no longer stretching content on to the right side. The 'See also' section is now also in place.
	Site Content
4598	<i>Fix to correct the browser heading spelling for Welsh English applications</i> In Welsh applications (shown in the English language) "Planning Portal 1Appenenen" previously displayed on browser headings and/or browser tabs for all application pages for IE6, IE8 and Firefox. This fix has now resolved this. A similar issue also occurred for the Welsh language version with '1Appcycycycy' displaying. This has now been fixed so that the correct browser headings are displayed.
	Applications
811	<i>Correct links to Notices 1 and 2 for Welsh applications</i> This fix has produced the correct links to Notices 1 and 2 within a Welsh application and now link to the correct Welsh versions of each notice.
